EDUCATION

University of Texas at San Antonio (UTSA)

B.S. Computer Science (Artificial Intelligence), Cyber Security Concentration

College of AI, Cyber and Computing • GPA: 3.05

Relevant Coursework: Data Structures, Discrete Mathematics, Object-Oriented Programming, Intro to Programming

Miller Career & Technology Center

Network Engineering I & II; Cybersecurity (Security+ exam prep)

San Antonio, TX

Expected May 2029

Katy, TX

2023 – 2025

TECHNICAL SKILLS

Certifications: CompTIA Security+, ServSafe

Languages: Python, JavaScript, TypeScript

Technologies: React, Electron, OAuth 2.0 (PKCE), MQTT, REST APIs, Vitest, Playwright, Git / GitHub

Hardware: PC building and hardware troubleshooting

PROJECTS

Life Hub | TypeScript, React, Electron | github.com/jhscherwitz/life-hub

Fall 2026

A desktop dashboard that pulls calendar, email, tasks, and Canvas grades into one page, with an AI assistant that takes actions. Runs entirely locally, with no server or account.

- Built an AI agent on Gemini function calling that plans across 25+ tools (calendar edits, Gmail drafts, web search), with an undo for every action it takes
- Connected Google Calendar and Gmail via OAuth 2.0 with PKCE; stored secrets encrypted with the OS keychain
- Sandboxed a built-in browser with context isolation, an isolated session, and ad/tracker blocking
- Wrote 360+ unit tests with Vitest and verified features end to end with Playwright

LockedIn | Vanilla JS, Python | github.com/jhscherwitz/lockedin

Fall 2026

A study dashboard I use daily, integrating Google Calendar, Spotify, Discord, and live multi-user session sync, with no framework, build step, or backend.

- Implemented Google Calendar OAuth 2.0 entirely client-side so no server ever holds a token
- Built Discord Rich Presence by implementing the local IPC wire protocol directly, using only the Python standard library
- Synced pause/resume across machines with a hand-written ~8KB MQTT client after WebRTC proved unreliable across home NATs
- Added Spotify playlists and an always-on-top timer using the Document Picture-in-Picture API

EXPERIENCE

Sushi Associate | Sam's Club (Sushi Stand)

May 2026 – Aug 2026

- Prepared fresh sushi, crab salad, and grab-and-go items daily while meeting food safety and quality standards; earned ServSafe certification
- Promoted products as the stand's sampler about half of each week, engaging customers to drive sales
- Handled opening/closing duties and restocking, working directly with the two owners

ACTIVITIES, SERVICE & VOLUNTEERING

- **Peer Reviewer** — IEEE Aerospace and Electronic Systems Magazine (2026)
- **UTSA Cybersecurity Club (Cyber Jedis)** — Member
- **RoadRunner Climbing** (UTSA climbing club) — Member
- **Golden Eagle Taekwondo** — Assistant instructor for children's classes; black belt
- **Church outreach** — Prepared lunches for children in need (Lunches of Love, 5 events) and packaged holiday gifts for families facing serious illness or hardship (Angels of Light, 4 events)
- **Boy Scouts** — Participated in community service and nonprofit events
